

Moving forward

RM-ODP

a safe architecture base

- It exists
- In use for specific architectures
 - TINA, MoD, ICL ...
- Being populated with technology
 - OMG, OSF, products

Adapting it to your needs

- **Interoperability** now
- **Dependability** now
- **Real time** 1996
- **Security** 1996
- **Methodology** some now, 1996
- **Federation** now
- **Multimedia** 1996

Growth

- **Architecture is a living thing**
 - **grows and develops**
 - » e.g. This needs continuous, focused activity
 - **define it**
 - **how to use it**
 - **checks and balances**
 - **how to enhance it**
 - **where new things fit in**
 - **influencing new standards**
- **Small, high quality effort**

OWNERSHIP OF THE ARCHITECTURE

- It **MUST** be yours
- **CONTROL** over your suppliers
 - they will resist
 - or try to own it
 - or tell you they've got a better one
 - » (... better for them!)

FOCUSED EFFORT

- Identified team Yes
- “Islands” No

Architectural skills

- Building the team
- Our experience with other sponsors

Building an architecture team

Architecture Team

- owns the architecture
- sets standards
- offers mentor guidance
- facilitates ideas exchange

Enterprise & Information	grow your current experts
Functional design	selective recruitment
Implementation	train your teams
Procurement	advisers

ensure synergy

Project Managers

This is how

- We did it at ANSA
- Other sponsors did it with our help
- We can help you

The Result

- **Clearer systems definitions**
- **Wider supplier choice**
- **Open interoperability**
- **Durability**
- **Ability to bring in new technology**
- **Evolution not revolution**
